NOTES:

Past performance should not be taken as an indication of future performance.

In accordance with industry standards, investment performance is generally calculated net of taxes and ongoing fees (such as the management fee and administration fee). However, when calculating investment performance, we generally don't take into account contributions tax and any discretionary ongoing fees such as insurance premiums.

~ Where an investment option has less than one year of performance data, the 'since inception' performance figure reported is the actual return the fund has achieved to date (therefore, short-term performance).
