Macquarie Diversified Fixed Interest Fund

Macquarie Investment Management Australia Limited has announced the following changes to the Macquarie Diversified Fixed Interest Fund that are effective 31 October 2017:

Feature	Current	New
Name	Macquarie Diversified Fixed Interest Fund	Macquarie Dynamic Bond Fund
Style	Multi-Manager	Single Manager
Investment objective	The fund aims to outperform the Bloomberg AusBond Composite 0+ Yr Index over the medium term (before fees) while providing a level of risk similar to that of an Australian fixed interest fund. It aims to provide a consistent level of income with some capital growth by using a diversified investment strategy.	The fund aims to outperform the Bloomberg AusBond Composite 0+ Yr Index over the medium term (before fees) while providing a level of risk similar to that of an Australian fixed interest fund. It aims to provide a consistent level of income with some capital growth by using a diversified investment strategy.
Investment strategy	<p>The fund provides exposure to an actively managed diversified portfolio of Australian fixed interest securities. The fund may also provide exposure to international fixed interest, such as global sovereign bonds, as well as an exposure to global investment grade credit securities, global high yield credit securities, emerging market debt and a range of other credit opportunities when they are expected to outperform and reduce exposure to these sectors when they are expected to underperform.</p> <p>Generally, exposure will be to fixed rate notes. The duration profile of the fund is actively managed through the use of derivatives such as swaps and futures. The investment process aims to reduce the risk of the fund being adversely affected by unexpected events or downgrades in the credit rating of the fund's investments. A disciplined framework is used to</p>	<p>The fund provides exposure to an actively managed diversified portfolio of Australian and International fixed interest securities such as sovereign bonds and investment grade credit. The Fund may also provide exposure to high yield credit securities and emerging market debt when these sectors are expected to outperform.</p> <p>Generally, exposure will be to fixed rate notes. The duration profile of the fund is actively managed through the use of derivatives such as swaps and futures. The investment process aims to reduce the risk of the fund being adversely affected by unexpected events or downgrades in the credit rating of the fund's investments. A disciplined framework is used to analyse each sector and proposed investment to assess its risk.</p> <p>The fund gains exposure to securities either directly or through funds managed by a member of the Macquarie Group.</p>

	<p>analyse each sector and proposed investment to assess its risk.</p> <p>The fund gains exposure to securities either directly or through funds managed by a member of the Macquarie Group and external managers, giving investors access to leading fixed interest managers around the world. The investment manager selects and continually reviews managers using a rigorous process that draws upon the resources and skills of all aspects of the investment manager's operations.</p> <p>The fund may be exposed to derivatives to implement its investment strategy. For example, protection may be purchased on issuers that are believed to be over-valued or at risk of downgrade. These positions increase in value when the underlying instrument falls in value and decrease in value when the underlying instrument rises in value.</p> <p>The portfolio is generally hedged to Australian dollars. Small active currency positions may be taken when the investment manager believes that there are opportunities to add value.</p>	<p>The fund may be exposed to derivatives to implement its investment strategy.
