**NOTES:**

Past performance should not be taken as an indication of future performance.

We calculate investment performance using the withdrawal unit price for each investment option in accordance with industry standards. Investment performance is calculated net of taxes and fees such as the investment fee, the investment performance fee, the administration fee, member fee and the expense recovery fee. However when calculating investment performance we do not take into account contributions taxes, the contribution fee, deferred contribution fee, withdrawal fee and any discretionary ongoing fees such as insurance premiums and adviser service fees.

~ Where an investment option has less than one year of performance data, the 'since inception' performance figure reported is the actual return the fund has achieved to date (therefore, short-term performance).
