## Overview

Suncorp Bank has maintained responsible and sustainable lending practices in an operating environment experiencing ongoing economic, political and regulatory pressures. The Bank recognises the destruction caused by Cyclone Debbie in Queensland and Northern New South Wales and is focused on supporting customers through this difficult period.

The home lending portfolio grew modestly over the quarter, reflecting challenging market conditions. The Bank continued to focus on targeted segments of the market, prioritising risk selection and quality.

Business lending growth was flat, with strong new business volumes offset by repayments from successfully completed property developments and favourable conditions for agribusiness customers leading to repayment of loans. Credit quality across Suncorp Bank's business loan portfolio remains sound, with a very small exposure to the higher risk lending segments of inner-city apartments and resources, with only a small number of businesses affected by downstream impacts from the resources industry slowdown.

Advanced risk management practices and models are continuously being enhanced across the Bank's portfolios. The benefits of prudent risk management are reflected in the continued strong credit quality performance over the quarter. Impairment losses of \$7 million or 5 basis points of gross loans and advances (annualised) remained below the expected operating range of 10 to 20 basis points and compares favourably to peers. Changes to operational processes relating to hardship were implemented, effective 1 January 2017, following guidance by APRA. There is no change to the risk profile of mortgages as a result of the operational changes, however, the impact of an increase in arrears reported are within the Bank's expectations.

The Bank's funding strength was demonstrated during the quarter through the successful pricing of a \$1.25 billion Residential Mortgage-Backed Security (RMBS) and an increase in the Net Stable Funding Ratio (NSFR) position, closing at 109%.

Following the payment of the interim FY17 dividend to Suncorp Group, the Bank's Common Equity Tier 1 ratio (CET1 ratio) continues to be strong at 9.19% and remains above the target range of 8.50% to 9.00%.

## Retail lending

The home lending portfolio grew over the quarter, with total housing loans closing at \$44.3 billion. Suncorp Bank continues to optimise volume and margin to maintain profitable and sustainable lending practices. Targeted customer offerings are integral to the Bank's growth strategy, with a strong focus on processing and turnaround efficiencies.

The Bank maintained a high quality lending portfolio as measured by serviceability, credit quality and loan to value ratios. Credit quality remained a priority with an increased focus on lending with strong credit attributes and a higher proportion of business on principal and interest terms. The Bank is well placed against current macro-prudential settings and has an opportunity to benefit as competitors adjust their customer offerings.

## Business lending

### Commercial (SME)

The commercial (SME) portfolio experienced moderate growth of 0.3% to \$5.5 billion during the quarter. The Bank remains focused on considered and disciplined growth within its risk appetite and continues to conservatively target growth within selected industry segments. Lending to inner-city apartment developments and customers affected by downstream impacts from the resources industry slowdown is low, well controlled and closely monitored. The Bank's exposure to inner-city development finance reduced during the quarter to approximately \$129 million, or 1.3% of the total business lending portfolio, as projects reached completion resulting in repayment of Bank debt. Projects that were completed over the past quarter have evidenced very low rates of buyers failing to settle. The Bank typically avoids projects with significant reliance on pre-sale to foreign investors and continues to focus on lending to developers with a strong track record in markets that are well understood by the Bank.

### Agribusiness

The agribusiness portfolio contracted 0.8% to \$4.3 billion during the quarter due to seasonal factors, as customers experienced favourable harvests and reduced their loan balances which was a positive development for the segment following several years of drought affected debt buildup. A clear risk appetite continues to guide decisions around new business, with the Bank pursuing diversified growth across regions and industries, targeting family operated farms and businesses.

## Weather events

To date, there has been limited overall impact on the Bank from Cyclone Debbie and related weather events. The Bank is working with a small number of retail customers experiencing difficulty through the hardship process and is assisting a limited number of impacted business customers. Suncorp Bank is focused on supporting impacted customers and regions through financial relief packages and is anticipating an increase in hardship, home lending arrears, and impaired assets over the next quarter. The Bank recognises that some geographic areas have benefitted from the rainfall associated with the event which will positively impact farming activities in coming months.

## Impairment losses on loans and advances

	QUARTER ENDED			MAR-17	MAR-17
	MAR-17	DEC-16	MAR-16	vs DEC-16	vs MAR-16
	\$M	\$M	\$M	%	%

<b>Impairment losses to gross loans and advances (annualised)</b>	<b>0.05%</b>	<b>-0.07%</b>	<b>0.03%</b>		

Impairment losses of \$7 million represents 5 basis points (annualised) of gross loans and advances, below the expected operating range of 10 to 20 basis points.

The Bank considers that the current level of provisioning is appropriate including holding relevant and appropriate economic and operational overlays that will be re-evaluated at the end of the financial year.

Write offs for the quarter remained low and reflected the finalisation of files in both the Business and Retail Recovery portfolios.

## Impaired assets

<b>Gross impaired assets to gross loans and advances</b>	<b>0.31%</b>	<b>0.34%</b>	<b>0.36%</b>		

Gross impaired assets decreased to \$169 million, representing 31 basis points of gross loans and advances.

Retail lending impaired assets remained flat, and Commercial impairments reduced as improved trading and asset sales allowed for debt reduction and a return to performing status for a small number of files.

The continuing improvement in Agribusiness impairments was driven by favourable operating conditions with above average rainfall across most parts of Australia, strong commodity prices for legumes and beef, and a lower Australian Dollar.

<b>Balance at the end of the period</b>	<b>169</b>	<b>185</b>	<b>190</b>	<b>(8.6)</b>	<b>(11.1)</b>

Gross non-performing loans increased 4.0% over the quarter to \$544 million, representing 100 basis points of gross loans and advances.

Past due loans that are not impaired increased 10.9% to \$375 million for the quarter. This mainly related to higher home lending arrears, arising from seasonality and the change in hardship operational processes effective from January 2017, as previously indicated.

Retail lending past due loans grew by \$39 million (12.9%) to \$341 million over the quarter, predominantly in Queensland, which accounts for 50% of the Bank's portfolio, and Western Australia, with increases of \$24.9 million (19%) and \$11.6 million (23%) respectively. Hardship relief cases accounted for \$28 million, or approximately 72% of the total increase in past due loans.

The Bank continues to conduct regular reviews of all non-performing loans, assessed against recent, relevant and objective data, to identify any material deterioration driving the requirement for impairment or a specific provision.

## Appendix 3 – Definitions

<b>ADI</b>	Authorised Deposit-taking Institution
<b>APRA</b>	Australian Prudential Regulatory Authority
<b>Capital adequacy ratio</b>	Capital base divided by total assessed risk, as defined by APRA
<b>Common Equity Tier 1</b>	Common Equity Tier 1 Capital (CET1) comprises accounting equity plus adjustments for intangible assets and regulatory reserves
<b>Common Equity Tier 1 ratio</b>	Common Equity Tier 1 divided by total assessed risk
<b>Credit Value Adjustment (CVA)</b>	A capital charge that covers the risk of mark-to-market losses on the counterparty credit risk
<b>Equity reserve for credit losses</b>	The equity reserve for credit losses represents the difference between the collective provision for impairment and the estimate of credit losses across the credit cycle based on guidance provided by APRA
<b>Gross non-performing loans</b>	Gross impaired assets plus past due loans
<b>Impairment losses to gross loans and advances</b>	Impairment losses on loans and advances divided by gross banking loans, advances and other receivables
<b>Net Stable Funding Ratio (NSFR)</b>	NSFR is a measure announced as part of the Basel III liquidity reforms that will apply from January 2018. The ratio establishes a minimum acceptable amount of stable funding (the portion of those types and amounts of equity and liability financing expected to be reliable sources of funds over a one-year time horizon under conditions of extended stress) based on the liquidity characteristics of an ADI's assets and activities over a one-year horizon.
<b>Past due loans</b>	Loans outstanding for more than 90 days
<b>Risk weighted assets</b>	Total of the carrying value of each asset class multiplied by their assigned risk weighting, as defined by APRA
<b>Total assessed risk</b>	Bank credit risk-weighted assets, off-balance sheet positions, market risk capital charge and operational risk charge, as defined by APRA
