

Suncorp LifeStage Fund 2000-2009
Product Dashboard

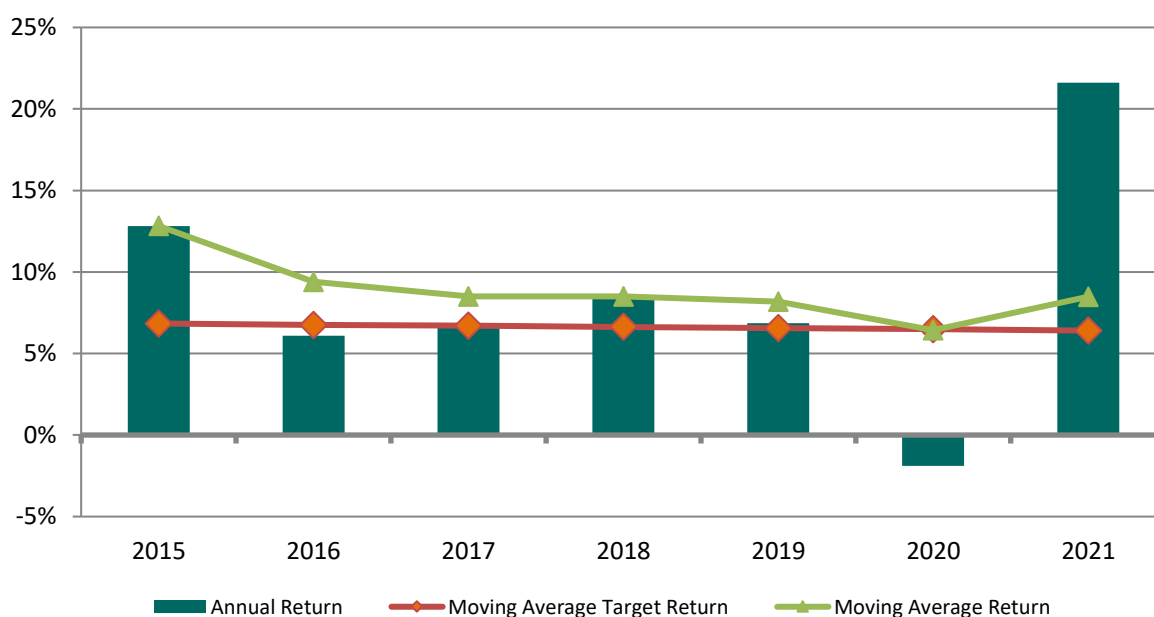

Return target⁴: 3.70% p.a.

Return¹

Year ending 30 June	Return %
2015	12.82
2016	6.08
2017	6.74
2018	8.52
2019	6.87
2020	-1.88
2021	21.60

Comparison between return target and return

Level of investment risk²

High - Negative returns expected in 4 to 6 out of every 20 years.

Statement of fees and other costs³

\$455.00 p.a

Important Notes

- Return represents the actual net return (after investment and administration fees and taxes) for a representative member with a \$50,000 balance.
- Level of investment risk is based on the Standard Risk Measure (SRM).
- Statement of fees and other costs represents the annual dollar value of investment, administration and indirect cost ratio costs paid by a representative member with \$50,000 balance.
- The return target shown on this product dashboard represents the mean annualised estimate of the percentage rate of net return for a representative member that exceeds the growth in the Consumer Price Index over 10 years from 1 July 2021. This differs to the investment objective shown in the Product Disclosure Statement and Product Guide as an investment objective is set using assumptions over longer periods than 10 years, as superannuation is a long-term investment. The return target may be lower than the investment objective, which currently reflects expectations of a lower investment return environment in the 10-year period from 1 July 2021.
